Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The Affidavit under 37 CFR 1.131 filed on 10/01/2004 is sufficient to overcome the US 6,571,117 reference to Marbach.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 12 and 14 are rejected under 35 U.S.C. 102(e) as being anticipated by Raz et al (US 6,181,414).

The patent teaches a multi-channel spectral imaging module, comprising (see abstract and col. 1, lines 7-12): a near infrared imaging detection system and a visible imagery system, a visible illumination source and a device for detecting said visible light from the illuminated area of ^{the} sample (see FIG. 1, col. 7. Lines 2-12).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 2877

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 21 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Raz et al (US 6,181,414). The patent teaches all as applied to claim 12, except that the visible imagery system comprises a microscope and a macroscope. However, the use of those is well known in the art of visible imagery systems (see US 5,645,550 and US 6,530,882 describing macroscoping and microscoping viewing modes).

Allowable Subject Matter

Claim 13 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 23-26 are allowed.

The following is an examiner's statement of reasons for allowance:

As to Claim 23, the prior art of record taken along or in combination, fails to disclose or render obvious processing said collected images to reconstruct an image of said sample, in combination with the rest of the limitations of the claim.

As to Claim 24, the prior art of record taken along or in combination, fails to disclose or render obvious processing said collected images to reconstruct an image of said sample, in combination with the rest of the limitations of the claim.

As to Claim 25, the prior art of record taken along or in combination, fails to disclose or render obvious a near infrared imaging spectrometer for selecting a near

Art Unit: 2877

infrared radiation image of said collimated light, in combination with the rest of the limitations of the claim.

As to Claim 26 the prior art of record taken along or in combination, fails to disclose or render obvious a near infrared imaging spectrometer for selecting a near infrared radiation image of said collimated light, in combination with the rest of the limitations of the claim.'

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

Applicant's arguments with respect to claims 12, 14, 21 and 22 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Papers related to this application may be submitted to Technology Center 2800 by facsimile transmission. Papers should be faxed to TC 2877 via the PTO Fax Center located in CP4-4C23. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). The CP4 Fax Center number is (703) 872-9306.

If the Applicant wishes to send a Fax dealing with either a Proposed Amendment or for discussion for a phone interview then the fax should:

- a) Contain either the statement "DRAFT" or "PROPOSED AMENDMENT" on the Fax Cover Sheet; and
- b) Should be unsigned by the attorney or agent.
